## DUTY OFFICER YELLOW

### 1 SAFE HOOK-UP POINT

Allows for immediate recovery at sea.

### 5 DETACHABLE SLEEVES

### 2 ANTI-PANIC LAMP

Quick-opening zipper, anti-panic, and salt-water-proof lamp. Facilitates rescue operations and allows for immediate unhooking from the lifejacket.

### 6 RADAR-DETECTABLE REFLECTIVE STRIPS

Light reflection system detectable by radar, facilitating identification at sea.

### 3 SEA FLOTEX

Sea Flotex is the special RINA approved floating padding, compliant for the manufacturing of life-jackets.

High thermal insulation even in the water.

### 7 CERTIFIED SIGNALLING LIGHT

Cold light device that facilitates detection at sea.

### 4 DETACHABLE HOOD

Detachable, ergonomic hood incorporated.

### 8 WHISTLE

Comes with acoustic device foreseen by the regulations.

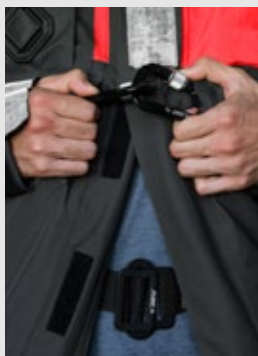

## TECHNICAL FEATURES

The Float Technology garments are the result of extensive experience in the maritime safety sector and feature a combination of unique technical aspects and innovative functional characteristics.

Float Technology is constantly subjected to effectiveness tests aimed at improving its performance in water and increasing the safety of rescue operations.

First and foremost, every Float Technology garment possesses an incredible reserve of buoyancy, obtained thanks to its special certificated Sea Flotex padding with an original patent, added to which it is possible to exploit the numerous accessories described below and illustrated in the photos on the back of this card, which allow for fitting out the garments so that they effectively respond to every use requirement. The Float Technology garments are also extremely comfortable to wear, even when fully equipped with the safety accessories.
